of Earth Sciences

Fédération Canadienne
des sciences de la terre

The Canadian Geoscience Education Network (CGEN) is the education arm of the Canadian Federation of Earth Sciences.

Le Réseau canadien d'éducation géoscientifique (RCEG), relève de la Fédération canadienne des sciences de la Terre.

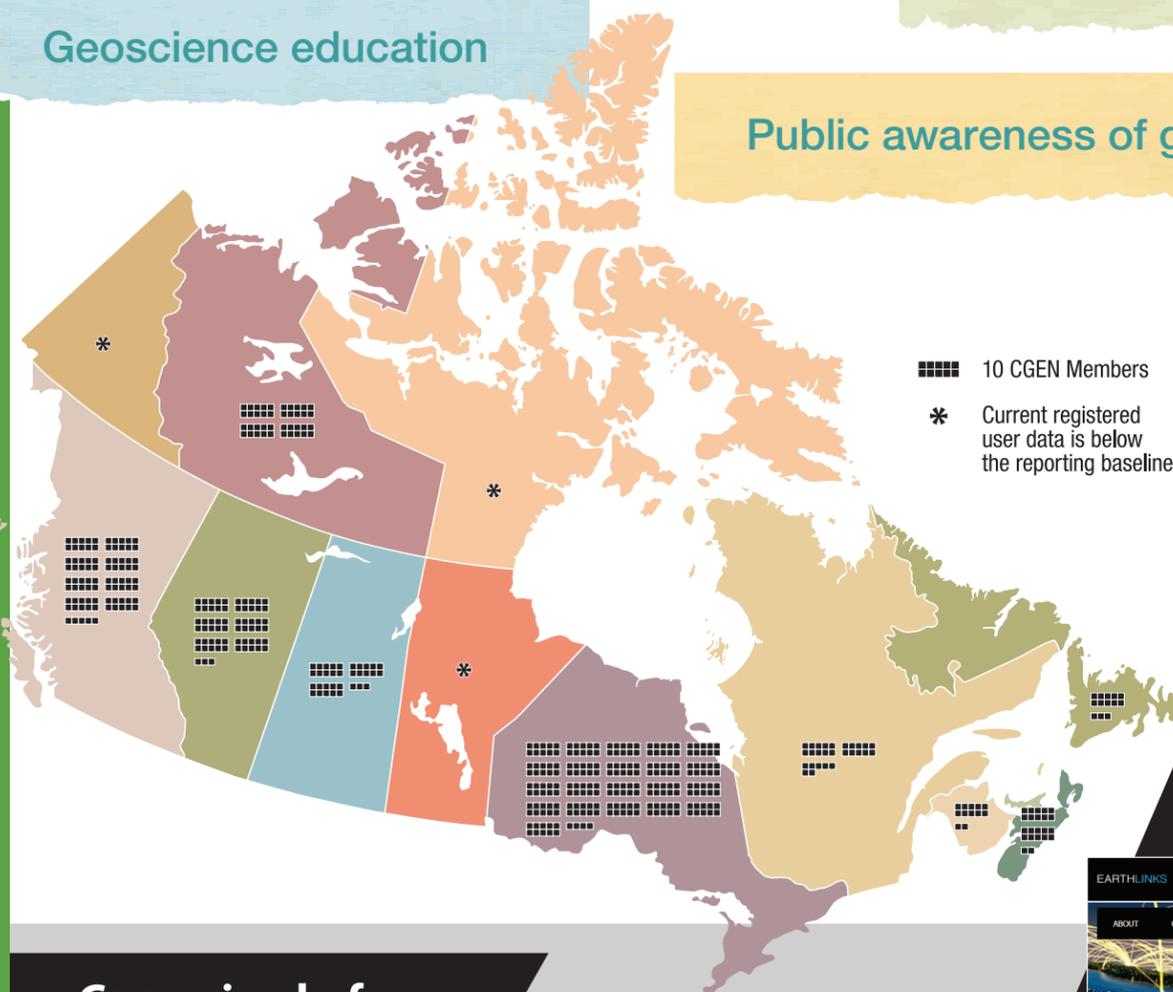

CGEN CANADA WIDE

A forum for discussion of matters related to geoscience

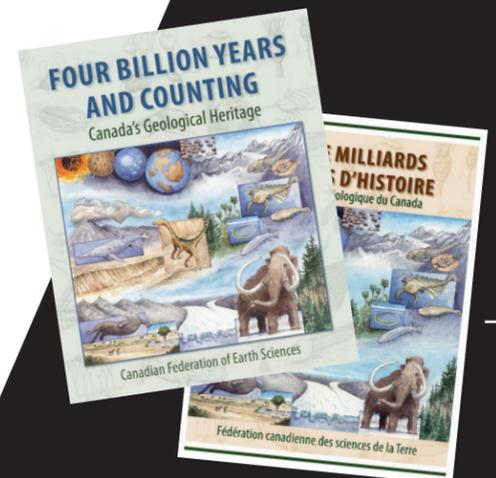

Geoscience education

Public awareness of geoscience

Legacy
Projects

- 10 CGEN Members
- * Current registered user data is below the reporting baseline

Comprised of:

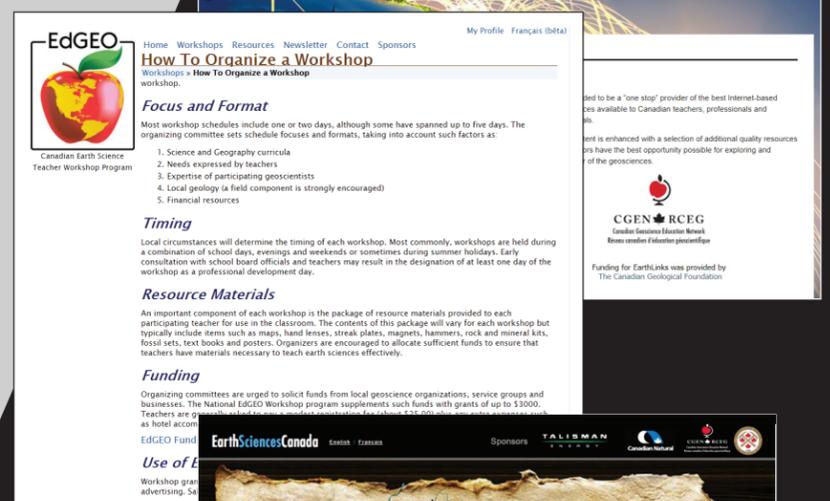

- Geoscientists
- Academia - college and university
- Teachers (K-12)
- Informal and outreach educators (museum, science centres, etc.)

Canadian Earth Science Teacher Workshop Program

CGEN RCEG

“ *Your support is key in making this possible. Find out how you can help.* ”

The EdGEO Teacher Workshop Program is coordinated by the Canadian Geoscience Education Network of the Canadian Federation of Earth Sciences.

The Gift of Time

Each EdGEO workshop requires about **200 hours** of volunteer time for its planning, promotion, preparation of activities, organizing associated field trips, building resource packages, registration, and communication with participants – all this before the workshop even begins! Add to that the time required for the workshop and follow-up, and clearly our workshop leaders have given the Earth science community a very generous gift.

200 HRS

100% Volunteer Powered

EdGEO runs solely on volunteer power, with no salaries paid. The result: each year at EdGEO workshops more than 300 teachers, on average, learn how to present the earth sciences to their students.

300 TEACHERS

Place-based field experiences

Showcase career pathways in geosciences

Collaborative industry-education partnerships

Funding provides Canadian educators with the means to bring authentic geoscience learning experiences to their students.

10 Years of Growth

Over the past decade, approximately 2800 teachers and 70,000 students benefited from what those teachers brought back to the classroom following the workshop.

Grants of up to **\$3,000** per workshop

EdGEO's Return on the Dollar

Teachers participating in EdGEO workshops take away the knowledge, tools, and confidence to teach Earth science to their students. So what does it cost?

- ★ \$70 per teacher participant in a workshop
- ★ \$2.80 per student in each participant's class the first year after
- ★ 28¢ per student during the participant's next ten years of teaching

Costs based on workshop expenses for the past year of \$15,550 and 220 participating teachers, and on an average class size of 25 students.

“ *The workshop exceeded my expectations. It should be held up as an example of how all other workshops should be done. ...I have never been disappointed.* ”
